13.6 Member of ISITC ....................................................................................................... 45
1.0 Introduction

The Accredited Standards Committee X9 (“X9”) has approximately 100 member companies that provide over 200 representatives that work on domestic and international standards related to the financial services industry. X9 is accredited by the American National Standards Institute (“ANSI”) to develop United States standards for the financial services industry and through ISO TC68 for the international financial services industry. X9’s program of work (“POW”) includes its American National Standards and technical reports, ISO TC68 standards and all whitepapers and documents approved by the X9 Consensus Body for release. This document captures the current POW for X9. If you have any questions, please contact staff at admin@x9.org.

1.1 Access to X9 Standards

X9’s standards and technical reports are available for download on the ANSI Store (Click for ANSI Store). Some documents are free but there is a nominal charge for most. This helps to defray the cost of developing the documents. Whitepapers, position statements and press releases are all free and are available for download from the X9 web site.

1.2 Participation in Developing ANSI or ISO Standards

To participate in the development of an ANSI or ISO standard, requires a paid membership in X9. The fee for membership is used to support X9. Most X9 study groups and industry forums are open for public participation without having to pay to join X9. Contact X9 for more details.

2.0 X9 Notices and Information

This Document is Published by:
Accredited Standards Committee X9, Financial Industry Standards
275 West Street, Suite 107
Annapolis, MD 21401 USA
Email: admin@x9.org
X9 Web Site: http://www.x9.org

Officers of X9:

| Corby Dear – Chair of the X9 Board of Directors | Alan Thiemann – Treasurer |
| Michelle Wright – V Chair of the X9 Board of Directors | Steve Stevens – Executive Director |

Staff:

| Janet Busch – Director of Operations and International Standards | Ambria Frazier – Manager of U.S. Standards and X9 Social Media |
| Lindsay Conley – Project Manager | Mark Tiggas - Payments Consultant |

26. X9 TR 55-20XX Framework for the Adoption of a Zero Trust in Information Systems
28. X9 TR 57-20XX Methods of Hybrid use of Post-Quantum Cryptography with Classical Cryptography Techniques
29. X9 TR 6-20XX Quality MICR Printing and Evaluation
30. X9 TR 8-20XX Check Security
31. X9.8-2 Approved Algorithms for PIN Encipherment
32. X9.100-10-202X Paper for MICR Documents
33. X9.100-110-202X Document Imaging Compatibility
34. X9.100-111-20XX Check Endorsements
35. X9.100-120-20XX (R2021) Bank Deposit Tickets
36. X9.100-130 (R20XX) Universal Interbank Batch/Bundle Ticket
37. X9.100-140-20XX Image Replacement Document (IRD)
38. X9.100-150-20XX (R2017) Check Carrier Envelopes
39. X9.100-151 (R20XX) Check Correction Strips
41. X9.100-160-2-202X Magnetic Ink Printing (MICR) - Part 2: EPC Field Use
42. X9.100-161 (R20XX) Creating MICR Document Specification Forms
43. X9.100-170 (R20XX) Check Fraud Deterrent Icon
44. X9.100-180-20XX (S2018) Specifications for Electronic Exchange of Check and Image Data (non-domestic)
45. X9.100-181-20XX (R2021) TIFF Image Format for Image Exchange
46. X9.100-182-20XX (R2017) Bulk Image and Data Delivery (standard, XSD Schema, and TR 40)
47. X9.100-183 (R20XX) Electronic Check Adjustments
48. X9.100-187-201XX Electronic Exchange of Check and Image Data
49. X9.100-188-20XX Return Reasons for Check Image Exchange and IRDs
50. X9.100-189-20XX Savings Bond Paying Agent Virtual Stamp
51. X9.100-20 Parts 1, 2 and 3 Print & Test Specifications for Magnetic Ink Printing
52. X9.100-30 (R20XX) Optical Measurement Specifications for MICR Documents
55. X9.102-20XX Symmetric Key Cryptography for the Financial Services Industry - Wrapping of Keys and Associated Data
56. X9.103-20XX (R2018) Motor Vehicle Retail Sale and Lease Electronic Contracting
57. X9.104-1-20XX (R2017) Financial transactions card originated messages - Card acceptor to acquiring host messages: Messages, data elements and code values
58. X9.104-2-20XX (R2016) Financial transaction card originated messages - Card acceptor to acquiring host messages - Part 2 Convenience store and petroleum marketing industry
60. X9.105-3-20XX/ISO 8583-1:20XX (R2019) Financial transaction card originated messages - Interchange message specifications - Part 3: Maintenance Procedures for messages, data elements and code values
61. X9.106-20XX (R2019)/ISO 18245 Retail Financial Services - Merchant Category Codes
62. X9.110-20XX(R2020) Transfer of Location of Electronic Contracts
63. X9.111-20XX Penetration Testing within the Financial Services Industry
64. X9.112-1-20XX Wireless Management and Security Part 1: General Requirements
66. X9.112-3-20XX Wireless Management and Security Part 3: Mobile Banking
68. X9.118-1/ISO 13616-1 Financial services - International bank account number (IBAN)
   - Part 1: Structure of the IBAN
69. X9.118-2/ISO 13616-2 Financial services - International bank account number (IBAN)
   - Part 2: Role and responsibilities of the Registration Authority
70. X9.119-1-202X Retail Financial Services - Requirements for Protection of Sensitive
    Payment Data - Part 1: Using Encryption Methods
71. X9.119-2 Requirements for Protection of Sensitive Payment Card Data - Part 2: Using
    Tokenization Methods
72. X9.121-20XX Balance and Transaction Reporting Standard
73. X9.12-XXXX (S20XX) Specifications for Fully Registered Municipal Securities
74. X9.122-202X Secure Consumer Authentication for Internet Debit Transactions
75. X9.123-201X Public Key Cryptography for the Financial Services Industry, Elliptic
    Curve Qu-Vanstone Implicit Certificates
76. X9.124-1-202X Symmetric Key Cryptography for the Financial Services Industry
    Format Preserving Encryption – Part 1: Definitions and Mode
77. X9.124-2 Symmetric Key Cryptography For the Financial Services Industry — Format
    Preserving Encryption- Part 2: Key Stream with Counter Mode
80. X9.124-5-202X Format Preserving Encryption – Part 5 Format-preserving Feistel-
    based Mode FF3.1
81. X9.125 Cloud Management & Security
82. X9.126-201X/ISO 17442-2019 LEI
83. X9.128 - Retailer interface for smart cards
84. X9.129-202X Legal Orders Exchange, Version 3
85. X9.130/ISO 10962 Classification of Financial Instruments (CFI)
86. X9.131-20XX Financial transaction messages - Electronic benefits transfer (EBT) –
    WIC retailer interface
87. X9.132 Issuer PIN Generation, Verification, and Storage Methodologies Using AES
88. X9.133-20XX Identity Based Encryption for the Financial Services Industry
89. X9.134-1 Core Banking: Mobile Financial Services – General Framework
90. X9.134-2-202X Security and Data Protection for Mobile Financial Services
92. X9.134-4-202X Mobile Payments-to-Persons
93. X9.135-20XX Secret Sharing Schemes
94. X9.137 Tokenization Management and Security
95. X9.138-202X Distributed Ledger Technologies Terminology
96. X9.139-20XX Interoperable Method for Distribution of Symmetric Keys Using
    Asymmetric Techniques: Part 1 - Using Factoring-Based Public Key Cryptography
    Unilateral Key Transport
97. X9.141 Financial and Personal Data Protection and Breach Notification Standard
98. X9.142-202X Public Key Cryptography: The Elliptic Curve Digital Signature Algorithm (ECDSA)
99. X9.143-20XX Interoperable Secure Key Exchange Key Block Specification for Symmetric Algorithms
100. X9.144 Production Subpoena Orders Exchange
102. X9.146-202X Quantum-Safe TLS Handshake Extension
103. X9.147-202X Audit Confirmation and Account Verification Exchange
104. X9.148 QR Code Protection using Cryptographic Solutions
107. X9.24-3-202X Retail Financial Services Symmetric Key Management Part 3: Derived Unique Key per Transaction
109. X9.44-20XX (R2017) Key Establishment Using Integer Factorization Cryptography
110. X9.58-20XX Financial transaction messages — Electronic Benefits Transfer (EBT) — Supplemental Nutrition Assistance Program (SNAP) and cash benefit programs
111. X9.59-20XX (R2013) Electronic Commerce for the Financial Services Industry: Account-Based Secure Payment Objects
112. X9.6-202X Committee on Uniform Security Identification Procedures Securities Identification CUSIP
113. X9.63-20XX Key Agreement and Key Management Using Elliptic Curve-Based Cryptography
114. X9.69-20XX Framework for Key Management Extensions
115. X9.73-20XX Cryptographic Message Syntax - ASN.1 and XML
116. X9.79-4-20XX Public Key Infrastructure - Part 4: Asymmetric Key Management
117. X9.80-202X Prime Number Generation, Primality Testing, and Primality Certificates
118. X9.8-1-20XX/ISO 9564-1-2017 (Identical Adoption) Financial Services – Personal identification number (PIN) management and security — Part 1: Basic principles and requirements for PINs in card-based systems
119. X9.82-1-202X Random Number Generation Part 1: Overview and Basic Principles
120. X9.82-2-20XX Random Number Generation Part 2: Entropy Sources
121. X9.82-3-20XX (R2017) Random Number Generation Part 3: Deterministic Random Bit Generator Mechanisms
122. X9.82-4 (R20XX) Random Number Generation Part 4: Random Bit Generator Constructions
123. X9.84-20XX Biometric Information Management & Security for the Financial Services Industry
See section 12.2 for a list of 103 international standards support by X9.
6.0 **X9A Subcommittee – Electronic and Emerging Payments**

**X9A Scope**
The X9A subcommittee develops and supports standards that are focused on electronic and mobile payments, including wholesale, retail, and benefits. This subcommittee also houses U.S. mirror groups to ISO TC68 that are responsible for developing and supporting international retail card and mobile-based payments.

**X9A Chair** - Guy Berg

**Current Standard Projects**
1. X9 TR 48-2018 CNP Fraud Mitigation
2. X9 TR 54-201x Framework for Auditing a Blockchain within a Distributed System
3. X9.104-1-2004 (R2017) Financial transactions card originated messages - Card acceptor to acquiring host messages: Messages, data elements and code values
10. X9.134-2-202x Security and Data Protection for Mobile Financial Services
12. X9.134-4-202X Mobile Payments-to-Persons
14. X9.58-201X Financial transaction messages — Electronic Benefits Transfer (EBT) — Supplemental Nutrition Assistance Program (SNAP) and cash benefit programs

6.1 **X9A1 Distributed Ledger Terminology (DLT) Work Group**

**X9A1 Scope**
The main goal for this work group is to publish and maintain a continuous maintenance standard for Distributed Ledger Terminology (DLT) that defines platform independent DLT based terms and definitions to enable common understanding and use in financial services. Given the current
embryotic state of this technology, this terminology is expected to change over time and this work effort will keep the standard updated as the industry evolves.

X9A1 Chair - Andrew Garner
X9A1 Vice Chair - Amy Kim

Current Standard Projects
1. X9.138-2020 Distributed Ledger Technologies Terminology

6.2 X9A2 Mobile Banking and Payments Work Group

X9A2 Scope
The X9A2 work group develops standards that support mobile financial services. The X9.134 effort seeks to develop a domestic mobile financial services standard modeled after the ISO 12812: Core Banking – Mobile Financial Services standard and technical specifications published in 2017. X9.134 consists of five parts: (1) a general framework; (2) security and data protection requirements, including authentication (3) app lifecycle management including authentication; (4) payments to persons; and (5) payments to businesses.

X9A2 Chair - David Nichamoff
X9A2 Vice Chair - Susan Pandy

Current Standard Projects
1. X9.134-1 Core Banking: Mobile Financial Services – General Framework
2. X9.134-2-202X Security and Data Protection for Mobile Financial Services
4. X9.134-4-202X Mobile Payments-to-Persons
5. ISO 8583 - Financial transaction card originated messages — Interchange message specifications

6.3 X9A3 Blockchain Auditing Work Group

X9A3 Scope
The use of DLT and other blockchain technologies and processes by financial institutions and trading partners is beginning to emerge. This work group will produce an auditing framework to support auditors or others considering the risks and developing assurance practices for permissioned blockchains used by financial services firms.

X9A3 Chair - Michael Versace
X9A3 Vice Chair - Angela Lawson

Current Standard Projects
1. ASC X9 TR 54-201x Framework for Auditing a Blockchain within a Distributed System

6.4 X9A11 Electronic Benefits Transactions Work Group

X9A11 Scope
The X9A11 work group develops standards around electronic benefits including Electronic Benefits Transactions (EBT), Supplemental Nutrition Assistance Program (SNAP), and Women Infant and Children program (WIC).
X9A11 Chair – Johnny Sena

Current Standard Projects
2. X9.58-201X Financial transaction messages — Electronic Benefits Transfer (EBT) — Supplemental Nutrition Assistance Program (SNAP) and cash benefit programs
7.0 X9B Financial Services Operations Subcommittee

X9B Scope

The X9B Financial Services Operations subcommittee develops and maintains standards and guidance focused on interoperability and reduction of dependency on manual and paper-based processing. These include standards for design of all elements of manufacturing, electronic processing, and delivery of checks, as well as other back-office operations, such as exchange of legal orders (subpoenas, levies, account related information and other similar services and operations).

X9B Chair - Jackie Pagan
X9B Vice Chairs - Margiore Romay, Michelle Wright and Clint Jones

Current Standard Projects

1. X9 TR 100-2019 Organization of Standards for Paper and Image-Based Check Payments
   Part 1: Organization of Standards, Part 2: Definitions used in Standards
2. X9 TR 2-2019 Understanding, Designing & Producing Checks
6. X9 TR 6-2016 Quality MICR Printing and Evaluation
7. X9 TR 8-2016 Check Security
8. SD023 Check Image Test Index
9. TR 33-2018 Check Image Quality Assurance with Data Transaction Integrity
10. TR 52-201X Remotely Created Checks (RCC) Design and Usage Guide
13. X9.100-10-202X Paper for MICR Documents
15. X9.100-111-2018 Check Endorsements
17. X9.100-130 (R2017) Universal Interbank Batch/Bundle Ticket
19. X9.100-150-2010 (R2017) Check Carrier Envelopes
20. X9.100-151 (R2017) Check Correction Strips
24. X9.100-170 (R2017) Check Fraud Deterrent Icon
29. X9.100-187-201x Electronic Exchange of Check and Image Data
30. X9.100-188-2018 Return Reasons for Check Image Exchange and IRDs
32. X9.100-20 Parts 1, 2 and 3 Print & Test Specifications for Magnetic Ink Printing
33. X9.100-30 (R2017) Optical Measurement Specifications for MICR Documents
35. X9.118-1/ISO 13616-1 Financial services - International bank account number (IBAN) - Part 1: Structure of the IBAN
36. X9.118-2/ISO 13616-2 Financial services - International bank account number (IBAN) - Part 2: Role and responsibilities of the Registration Authority
37. X9.128 - Retailer interface for smart cards
39. X9.144 Production Subpoena Orders Exchange
40. X9.147-202X Audit Confirmation and Account Verification Exchange

7.1 X9B1 Organizational Standards Paper & Image Work Group

X9B1 Scope
The X9B1 work group supports the organization of check related payment standards and the definitions used in those standards.

X9B1 Chair - John McCleary and Michelle Wright
X9B1 Vice Chair - Daniel Welch

Current Standard Projects

7.2 X9B2 Check and Image Related Standards Work Group

X9B2 Scope
The X9B2 work group supports standards and guidelines for check image exchange, file formats, TIFF and substitute check creation.

X9B2 Chair - Stephen Gibson-Saxty and Phyllis Meyerson

Current Standard Projects
1. X9 TR 2-2019 Understanding, Designing & Producing Checks
4. X9 TR 33-2018 Check Image Quality Assurance with Data Transaction Integrity
5. X9.100-140-2018 Image Replacement Document (IRD)
10. X9.100-187-201x Electronic Exchange of Check and Image Data
11. X9.100-188-2018 Return Reasons for Check Image Exchange and IRDs

7.3 X9B3 Check Printing and Related Standards Work Group

X9B3 Scope
The X9B3 work group supports standards and guidelines for the production, printing, and testing of paper checks.

X9B3 Chair - Daniel Welch

Current Standard Projects
1. X9 TR 6-2016 Quality MICR Printing and Evaluation
2. X9 TR 8-2016 Check Security
3. TR 52-201X Remotely Created Checks (RCC) Design and Usage Guide
4. X9.100-10-202X Paper for MICR Documents
5. X9.100-110-202X Document Imaging Compatibility
6. X9.100-111-2018 Check Endorsements
8. X9.100-130 (R2017) Universal Interbank Batch/Bundle Ticket
9. X9.100-150-2010 (R2017) Check Carrier Envelopes
10. X9.100-151 (R2017) Check Correction Strips
14. X9.100-170 (R2017) Check Fraud Deterrent Icon
15. X9.100-20 Parts 1, 2 and 3 Print & Test Specifications for Magnetic Ink Printing

7.4 X9B4 Legal Order Processing Work Group

X9B4 Scope
The X9B4 work group supports the development of standards and guidelines for electronic legal order processing including levies and subpoenas. Working in collaboration, several financial institutions and state agencies have already created and implemented a standard for exchanging requests for information and payment related to levies, child support arrears, and taxes through X9B22 in an electronic file format. This workgroup is also focused on developing a standard for third parties to request financial information pursuant to subpoenas and similar legal requests, as well as the responses of financial institutions.

X9B4 Chair - Clinton Jones and Erica Livingston
Current Standard Projects
3. X9.144 Production Subpoena Orders Exchange

7.5 X9B5 Audit Confirmation & Account Verification Work Group

X9B4 Scope
In most cases across the industry audit confirmations and deposit and account verifications are simple but very manual. They are received by mail, FAX, email or through a third-party web service that has to be accessed in order to ingest the request. Developing a data exchange standard that maps to the deposit systems of the financial institutions could automate the largest majority of this work and expedite service to the requestor while drastically reducing the expense for the financial institution.

X9B5 Chair - Clinton Jones

Current Standard Projects
1. X9.147 – Audit Confirmation and Account Verifications
8.0 X9C Corporate Banking Subcommittee

X9C Scope
Corporate Banking is an umbrella term for treasury, finance, and cash management functions within a corporation and for banking services offered to corporations. Corporate banking is separate from capital-raising, mergers advice or risk mitigation. It's usually the work-a-day stuff of a corporate treasurer: Moving cash between thousands of separate accounts; handling foreign-currency transactions; financing short-term trade balances; and processing customer payments. As payments evolve to real-time, X9C is committed to supporting Faster Payment initiatives to ensure a thoughtful end-to-end payment experience for corporate-related payments. Through ISO 20022 XML formats, payment origination and reporting can be greatly normalized across payment systems worldwide to simplify processes to identify and book payments. X9C will work closely with the Federal Reserve, The Clearing House, SWIFT, and other industry-leading clearing and standards organizations as they introduce these payment methods to the corporate community. X9C will collaborate with other X9 work-streams, including X9A that oversees consumer card payments.

X9C Chair - David Repking
X9C Vice Chair - Stephen Ranzini

Current Standard Projects
1. ASC X9 TR 42-2014 Core Deduction Reason Codes
2. ASC X9 TR 44-2013 Remittance Standards Inventory
3. ASC X9 TR 45-2016 Retail Industry Debit Balances Best Practices, Terminology, and Procedures
4. TR 43-2014 Remittance Glossary
6. X9.110-2008(R2020) Transfer of Location of Electronic Contracts
7. X9.121-2016 Balance and Transaction Reporting Standard

8.1 X9C1 Balance Transaction Reporting Specification (formerly BAI’s Cash Management Reporting) Work Group

X9C1 Scope
In 2009, the Banking Administration Institute transferred the copyright of BAI2 to X9. Since that time, X9C1 revised the format into the BTRS/BTR3 standard by modernizing the codes list and rewriting the Format Guide to be more of a technical specification (both are available free for download on the x9.org/BTRS site). In 2020, X9C1 made further BTRS updates to standardize Information Reporting of Real-Time Payments (RTP) from The Clearing House. X9C1 will continue to follow Faster Payments initiatives to promote normalization of payment reporting between banks and from banks to corporates.

X9C1 Chair - David Repking

Current Standard Projects
1. X9.121-2016 Balance and Transaction Reporting Standard
9.0 X9D Securities Subcommittee

X9D Scope
X9D is the securities subcommittee of X9. Their scope includes the development, maintenance, and adoption of standards that facilitate global straight-through processing and shortened settlement cycles in the securities industry. It also includes the maintenance of standards for clearance, settlement, transfer and related processes for physical securities in the US marketplace. X9D develops recommendations for US input into ISO 20022 Securities work efforts.

X9D Chair - Thomas Brown Jr.
X9D Vice Chair - Corby Dear

Current X9 Standard Projects

10.1 X9F1 Cryptographic Tools Work Group

X9F1 Scope
The Cryptographic Tools workgroup is responsible for drafting cryptographic algorithm standards under the X9F subcommittee. These tools are intended to be used to provide guidance for implementing confidentiality, integrity, and non-repudiation protection of financial data as well as authentication of financial system users. Standards drafted within the X9F1 work group are often referenced within other ASC X9 standards when such cryptographic tools are required. These standards are based on accepted cryptographic practices and sound mathematical techniques. The X9F1 work group maintains the ASC X9 Registry of Approved Cryptographic Resources for Financial Services Industry Standards, which references selected standards and techniques that were developed outside of ASC X9 but are now approved for ASC X9 use. X9F1 membership consists of government agencies for technology and security, consulting organizations, financial product vendors, financial service providers and end-users financial institutions.

X9F1 Chair - Michael Talley
X9F1 Vice Chair - Ralph Poore

Current Standard Projects
1. SD034 Registry of Approved Cryptographic Resources
2. SD036 ISO TC68 SC2 Secretariat Report September 2009
4. X9 TR 57 Methods of Hybrid use of Post-Quantum Cryptography with Classical Cryptography Techniques
5. X9.102-2020 Symmetric Key Cryptography for the Financial Services Industry - Wrapping of Keys and Associated Data
11. X9.124-5-2021 Format Preserving Encryption – Part 5 Format-preserving Feistel-based Mode FF3.1
12. X9.133-201x Identity Based Encryption for the Financial Services Industry
13. X9.135-201x Secret Sharing Schemes
14. X9.142-2020 Public Key Cryptography: The Elliptic Curve Digital Signature Algorithm (ECDSA)
17. X9.62-2005 Public Key Cryptography: The Elliptical Curve Digital Signature Algorithm (EDCSA)
18. X9.63-201X Key Agreement and Key Management Using Elliptic Curve-Based Cryptography
20. X9.82-1-202X Random Number Generation Part 1: Overview and Basic Principles
23. X9.82-4 (R2017) Random Number Generation Part 4: Random Bit Generator Constructions
25. X9.98-2010 (R2017) Lattice-Based Polynomial Public Key Encryption Algorithm part 1: Key Establishment; Part 2: Data Encryption

10.2 X9F4 Cybersecurity and Cryptographic Solutions Work Group

X9F4 Scope
The X9F4 workgroup focuses on drafting security standards for the proper implementation and evaluation of protocols and technologies for the financial services industry. One of four work groups reporting to the X9F subcommittee and established in 1996 to draft a secure remote banking standard, the X9F4 work group has had its scope expanded over the years to include cryptographic message syntax (CMS), public key infrastructure (PKI), biometrics, trusted time stamps and mutual authentication standards. X9F4 membership consists of consultants, auditors, attorneys, service providers, product providers and end-users, including both government as well as financial institutions. X9F4 provides technical comments on international standards in support of the X9 role as the US technical advisory group (TAG) to ISO TC68 Financial Services. Overall, the X9F4 work group is drafting or initiating revisions to over a dozen standards.

X9F4 Chair - Jeff Stapleton
X9F4 Vice Chair - Sandra Lambert

Current Standard Projects
1. X9 TR 50-2019 Quantum Techniques in Cryptographic Messaging Syntax (CMS)
2. X9 TR 53-201X Cybersecurity Diversity Index
3. X9 TR 55-201X Framework for the Adoption of a Zero Trust in Information Systems
5. X9.111-2018 Penetration Testing within the Financial Services Industry
10. X9.119-2 Requirements for Protection of Sensitive Payment Card Data - Part 2: Using Tokenization Methods
12. X9.125 Cloud Management & Security
17. X9.84-2018 Biometric Information Management & Security for the Financial Services Industry
18. X9.95-2016 Trusted Time Stamp Management and Security

10.3 X9F5 Financial PKIs Work Group

X9F5 Scope
X9F5 Public Key Infrastructure (PKI) workgroup develops standards, technical reports, and other PKI-related documents including Certificate Practice Statement (CPS) for the financial service industry. The workgroup supports the X9F PKI Study Group and the US TAG to ISO TC68/SC2/WG8 PKI. X9F5 also monitors other PKI standards and liaisons with other PKI-related development organization (SDO) and industry groups.

X9F5 Chair - Tim Hollebeek
X9F5 Vice Chair - Clay Epstein

Current Standard Projects
1. X9.146-202X Quantum-Safe TLS Handshake Extension
2. X9.79-4-201X Public Key Infrastructure - Part 4: Asymmetric Key Management

10.4 X9F6 Cardholder Authentication Work Group

X9F6 Scope
X9F6 writes and maintains standards used in retail financial services to support authentication of payment card users. The suite of standards addressed by the work group includes standards on the secure management and handling of Personal Identification Numbers (PINs), encryption key management for keys used in retail financial transactions, message authentication, tamper-
resistant security module evaluation, and Integrated Chip Cards (ICCs). The work group is also responsible for a series of technical reports that provide usage guidance for its standards.

X9F6 provides U.S. subject matter experts on the security aspects of card payments to ISO TC68/SC2/WG13 and WG11. The documents developed by these two ISO groups are circulated within X9F6 for comments and recommendations. Some of the topics include biometrics used for payments and Message Authentication Code (MAC) algorithms.

**X9F6 Chair** – Scott Spiker  
**X9F6 Vice Chair** – Joshua Peak

**Current Standard Projects**

2. X9 TR 31-2018 Interoperable Secure Key Exchange Key Block Specification for Symmetric Algorithms
5. X9.8-2 Approved Algorithms for PIN Encipherment
8. X9.139-201X Interoperable Method for Distribution of Symmetric Keys Using Asymmetric Techniques: Part 1 - Using Factoring-Based Public Key Cryptography Unilateral Key Transport
12. X9.24-3-202X Retail Financial Services Symmetric Key Management Part 3: Derived Unique Key per Transaction

**X9F6 is Currently Reviewing the Following ISO Standards:**

1. ISO 9564-1 - Financial services — Personal Identification Number (PIN) management and security — Part 1: Basic principles and requirements for PINs in card-based systems
2. ISO 9564-6 – PIN on COTS (commercial off the shelf)
3. ISO 11568 – Key management (X9.24 all parts into one ISO document)
4. ISO 13491-1 - Financial services - Secure cryptographic devices (retail) - Part 1: Concepts, requirements and evaluation methods
5. ISO 13491-2 - Financial services — Secure cryptographic devices (retail) — Part 2: Security compliance checklists for devices used in financial transactions
6. ISO 19092 – Biometrics for payment
7. ISO 16609 – Requirements for message authentication
8. ISO 14742 – Recommendations on cryptographic algorithms and their use (considerations for Quantum)
11.0 X9 Study Groups and Industry Forums

11.1 X9A – USDA EBT Chip Card Industry Forum
Created: June 21, 2023

Scope
The purpose of this industry forum is to provide an environment for the groups associated with the USDA’s issuance, processing and redemption of SNAP benefits to discuss issues related to the upgrading of the SNAP EBT card to a chip card, as well as the associated updates around mobile NFC payments and SNAP Electronic Healthy Food Incentive Program (eHIP). These groups include the USDA, State Agencies, Retailers, Card Processors, and others. The group is to work through issues related to upgrading the SNAP EBT card and make recommendations to the X9A11 work group which is responsible for the ASC X9.58 standard that controls the SNAP card. The group will provide an open forum to discuss and reach consensus on these issues. Industry Forum cannot generate X9 standards representative participants will collaborate to define use cases from a practitioner point of view and to understand best practices across payment types, based on consensus across industries.

Forum Chair – Jamie Topolski

11.2 X9C - U.S. ISO 20022 Market Practice Industry Forum

Created: October 14, 2020

Scope
U.S. ISO 20022 Market Practice Industry Forum identifies and addresses important topics for market coordination to promote consistent industry approaches for ISO 20022 implementations, and to lower the barriers to adoption. Toward those ends, the group proposes to bring together a broad spectrum of stakeholders, including corporations and other industry organizations. These representative participants will collaborate to define use cases from a practitioner point of view and to understand best practices across payment types, based on consensus across industries.

Forum Chair - David Repking

11.3 X9D - Financial Data Integration and Harmonization Industry Forum

Created: March 26, 2021

Scope
The Financial Data Integration and Harmonization Industry Forum was created to perform the following functions:
1. Review and harmonize current differences in financial data standards terms, meanings and definitions (Establish a common Data Dictionary);
2. Identify key financial instrument reference data gaps and propose solutions to address these gaps, including integration of multiple data sets;
3. Identify financial data service functions that are currently unavailable to meet critical industry needs; and
4. Work with participating organizations to resolve identified issues.
Initially, the forum will assess the state of financial and reference data used by the financial industry by seeking input from industry experts and data providers. After the assessment period, the forum will create a white paper on its initial findings and provide guidance on what additional actions may be required. The Forum will regularly provide feedback to the X9 Board on its progress toward meeting these goals.

**Forum Chair** – Tom Brown

**11.4 X9C Real-time Payments Study Group**

**Scope**
This study group is focused on faster/real-time payments. The study group will review real-time and faster payments activity in the financial industry, with the intent to become X9’s central point of contact for all related and supporting X9 technical standards and to coordinate related work within X9.

**X9 Real-time Payments Study Group Chair** - Stephen Ranzini

**11.5 X9F Cryptographic Algorithm Sunrise/Sunset Study Group**

**Scope**
Cryptographic Algorithm Sunrise/Sunset Study Group has been formed under the X9F subcommittee. The purpose of this study group is to document cryptographic algorithm sunrise and sunset dates. This is needed to address industry changes in what is deemed acceptable for adequate protection of sensitive data. As each subcommittee talks about how to move the industry standards forward and away from older inadequate protocols, it was determined the best approach was to scope, select and document sunrise and sunset dates for cryptographic algorithms used in X9 standards.

The objectives for the Cryptographic Algorithms Study Group are to:
- Review and validate the new approach for establishing sunrise and sunset dates for cryptographic algorithms in X9 standards.
- Identify a minimum scope (i.e., applicable X9 standards and Registry) for each work group.
- Define an action plan across the work groups to define and document sunrise and sunset dates to address the minimum scope.

**Sunrise/Sunset Study Group Chair** – Ralph Poore

**Current Projects**
1. ASC X9 SD-34-2009 – Registry of Approved Cryptographic Resources for Financial Services Industry Standards

**11.6 X9F Public Key Infrastructure (PKI) Study Group**

**Scope**
The focus of this study group is to examine the reliance concerns and processing issues related to “Certificate Authority” third party service providers and the possibility of operating a centralized
Certificate Authority specifically devoted to the financial services industry. This would be a Certificate Authority on which trust for current and future financial industry security could rely upon as a fully interoperable point of service that would exist above any question of security, user authentication, or commercial interest. It would also be independent of rules and requirements from other industry groups which have much different needs than the financial community.

Existing commercial Certificate Authorities exist primarily for the Web PKI, that is, the general usage of the Internet by businesses and individuals. This has traditionally been governed by Browsers, who consume certificates to present security information in their user interface. However, Browsers and the financial community interests are not always aligned. Hence when Browsers dictate policies which Certificate Authorities are forced to follow; the financial community has no choice but to go along.

This group will examine options to determine a way that would protect the financial community’s interest while maintaining a strong security posture.

Update: the group is currently proceeding with foundational work to establish a financial PKI product governed by X9 standards.

**PKI Study Group Chair** - Dean Coclin
**PKI Study Group Vice Chair** - Bill Poletti

### 11.7 X9F Quantum Computing Risk Study Group

**Scope**
The Quantum Computing Risk study group was created to review the state of quantum computing and determine a best estimate for when a large-scale, fault tolerant quantum computer capable of cracking certain current cryptography will exist. Based on this prediction, the group will propose a plan for how X9 will address the issues and develop plans for members of the U.S. financial industry to use to address these issues.

**X9F Quantum Computing Risk Study Group Chair** - Steve Stevens
**X9F Quantum Computing Risk Study Group Vice Chair** – Tim Hollebeek

**Current Projects**
1. [ASC X9 IR 01-2019 – Quantum Computing Risks to the Financial Services Industry](#)
2. ASC X9 IR 02-2021 – Quantum Computing Risk Check List
3. Propose a process for X9 to identify and address risks posed by quantum computers

### 11.8 X9F Artificial Intelligence Study Group (4/21/2023)

**Scope**
The group should initially investigate the current AI product offerings and learn as much as possible about each. Special addition should be given to products that target the financial industry. The group should then create educational information for X9 members targeted to people with little or no background in AI. The group should identify areas where standards are or
could be needed to safeguard financial and user data. The group should also investigate and document general use cases for AI in the financial industry. The group may investigate any aspect of AI that may pertain to or be usable by the Financial Industry. With respect to the educational information, the group should attempt to provide at least high-level information on the following topics: 1) What companies have AI products that can at least be demonstrated today? 2) Identify AI products that target financial applications. 3) What methods of learning do the AI engines use and what information would they need? If the required information includes sensitive data, how would that data be protected? 4) What features or improvements are already planned for future releases? 5) Identify some of the ways AI could help reduce cost or friction in the financial industry. 6) Identify potential security issues created by the introduction of an AI product in a financial environment. 7) Consider what security requirements would be needed within an AI product to protect data or infrastructure connected to the AI product.

X9F Quantum Computing Risk Study Group Chair – Peter Bordow
X9F Quantum Computing Risk Study Group Vice Chair – Ralph Poore
12.0 International Financial Standards Work

The International Organization for Standardization (“ISO”) develops international standards for many industries, including the financial industry. Membership in ISO is by country. Countries that participate in ISO have national standard’s bodies that join one or more ISO committees or groups and they represent their home country on those committees and groups. When a national standard’s body joins an ISO committee or group, they create a Technical Advisor Group (“TAG”) for that ISO committee or group. Individual companies or organizations can participate on an ISO committee or group by joining their country’s TAG for that ISO committee or group.

Through ANSI, X9 represents the United States on ISO TC68, TC68/SC2, TC68/SC8, TC68/SC9 and ISO TC321. X9 has TAGs for each committee and group and they are described in more detail below. Most TAGs meet every month. Participation in an X9 TAG is restricted to category A members of X9.

For ISO TC68, X9 provides leadership of the ISO committee by performing the secretariat functions and by providing the committee’s chair. Additionally, X9 has liaisons with other organizations to monitor work that may have an impact on the financial services industry.

12.1 ISO TC68 Financial Services (X9 is the US TAG and Secretariat)

Scope
Technical Committee 68 (ISO/TC 68) is responsible for creating global standards for the financial services industry. TC 68 is responsible for standards that cover core banking, capital markets including asset management, payments, credit card processing, and information security aspects specific to financial services. The committee is organized into three subcommittees: SC2 (Information Security), SC8 (Reference Data), and SC9 (Information Exchange). ISO standards can be purchase from the ISO Store. Click here for just TC68 standards.

The ISO 20022 messaging standard is controlled by TC68/SC9. Operational data used by the ISO 20022 standard is governed by the ISO 20022 RMG. The X9 TAG to ISO TC68/SC9 is the gateway to both SC9 and the RMG.

ISO TC68 Chair – Jim Northey (US-X9)
ISO TC68 Secretariat – Janet Busch (US-X9)

12.2 List of International Standards Supported by X9 (including projects for ISO TC68, TC68/SC2, TC68/SC8 and TC68/SC9)

3. ISO 10383:2012 - Securities and related financial instruments — Codes for exchanges and market identification (MIC)
4. ISO 10962:2019 - Securities and related financial instruments — Classification of financial instruments (CFI) code
6. ISO 11568-2:2012 - Financial services — Key management (retail) — Part 2: Symmetric ciphers, their key management and life cycle
7. ISO 11568-4:2007 - Banking — Key management (retail) — Part 4: Asymmetric cryptosystems — Key management and life cycle
8. ISO 11649:2009 - Financial services — Core banking — Structured creditor reference to remittance information
9. ISO 12812-1:2017 - Core banking — Mobile financial services — Part 1: General framework
14. ISO 13616-2:2020 - Financial services — International bank account number (IBAN) — Part 2: Role and responsibilities of the Registration Authority
15. ISO 15022-1:1999 - Securities — Scheme for messages (Data Field Dictionary) — Part 1: Data field and message design rules and guidelines
16. ISO 15022-1:1999 - Securities — Scheme for messages (Data Field Dictionary) — Part 1: Data field and message design rules and guidelines — Technical Corrigendum 1:
19. ISO 16609:2012 - Financial services — Requirements for message authentication using symmetric techniques
20. ISO 17442-1:2020 - Financial services — Legal entity identifier (LEI) — Part 1: Assignment
22. ISO 18245:2003 - Retail financial services — Merchant category codes
23. ISO 18774:2015 - Securities and related financial instruments — Financial Instrument Short Name (FISN)
31. ISO 20022-7:2013 - Financial services — Universal financial industry message scheme — Part 7: Registration

12.2.1 X9 TAG to ISO TC68 - Financial Services
ISO TC68 is a Technical Committee of ISO. It has been designated by ISO to be responsible for International Financial Standards. At present, all development and maintenance of standards have been moved to the subcommittees under ISO TC68. This may change in the future. While not having active standards to support, ISO TC68 is still responsible for the management and oversight of the subcommittees and their work. The X9 TAG to ISO TC68 is responsible for representing the United States on any issues before ISO TC68. This includes tracking the activities of TC68, providing the vote for the United States on any TC68 ballot, and providing subject matter experts when needed. The TAG may, with the support of other members, put forward a request for a new work item as the need is identified. Note: TC68 does have several work groups that report to it but these groups are not developing standards.

The TC68 TAG meets every three months or more often if needed.

TAG Chair: Corby Dear

12.2.2 X9 TAG to ISO TC68/SC2 - Information Security
ISO TC68/SC2 was established to look at Information Security for the financial industry. This includes cryptographic algorithms to protect financial data. The X9 TAG to ISO TC68/SC2 is responsible for representing the United States on any issues before ISO TC68/SC2. This includes tracking the activity of SC2, providing the vote for the United States on any SC2 ballot, and providing subject matter experts when needed to develop international ISO standards. The TAG may, with the support of other members, put forward requests for new work items as the need is determined. The SC2 subcommittee has the following work groups:

<table>
<thead>
<tr>
<th>Work Group</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>WG8</td>
<td>PKI/Quantum</td>
</tr>
<tr>
<td>WG11</td>
<td>Encryption</td>
</tr>
<tr>
<td>WG13</td>
<td>Security in Retail Banking (F6)</td>
</tr>
<tr>
<td>WG16</td>
<td>3rd Party Payment</td>
</tr>
<tr>
<td>WG17</td>
<td>Digital Currency</td>
</tr>
<tr>
<td>WG18</td>
<td>Customer ID</td>
</tr>
<tr>
<td>WG19</td>
<td>Code scanning payments (QR)</td>
</tr>
</tbody>
</table>

The X9 TAG to ISO TC68/SC2 meets once a month. As with all international work, only X9 Category A members can participate. (This restriction is due to the added expense to X9 for working with ISO.)

The TC68/SC2 TAG meets every month or as needed.

TAG Chair: Richard Kisley

12.2.3 X9 TAG to ISO TC68/SC8 – Reference Data
ISO TC68/SC8 handle data used to identify, classify, and track financial information. The X9 TAG to ISO TC68/SC8 is responsible for representing the United States on any issues before ISO TC68/SC8. This includes tracking the activity of SC8, providing the vote for the United
States on any SC8 ballot, and providing subject matter experts, when needed, to develop international ISO standards. The TAG may, with the support of other members, put forward requests for new work items as the need is determined. The SC8 subcommittee has the following work groups:

<table>
<thead>
<tr>
<th>Work Group</th>
</tr>
</thead>
<tbody>
<tr>
<td>SG5 – Digital wallet</td>
</tr>
<tr>
<td>WG3 – Digital token ID</td>
</tr>
<tr>
<td>WG7 – Nature Person ID (Mirror group at present)</td>
</tr>
<tr>
<td>WG10 – Revision of FIN</td>
</tr>
<tr>
<td>WG11 – Verifiable LEI</td>
</tr>
</tbody>
</table>

The X9 TAG to ISO TC68/SC8 meets once a month, usually after the X9D monthly meeting. As with all international work, only X9 Category “A” members can participate. (This restriction is due to the added expense to X9 for working with ISO.)

The TC68/SC8 TAG meets every month, usually either before or after the X9D meeting.

**TAG Chair:** Tom Brown

12.2.4 X9 TAG to ISO TC68/SC9 – Information Exchange

ISO TC68/SC9 handles standards related to information exchange. The best-known standard, controlled by SC9, is ISO 20022. This standard is widely used around the world and its acceptance is growing rapidly. The X9 TAG to ISO TC68/SC9 is responsible for representing the United States on any issues before ISO TC68/SC9. This includes tracking the activity of SC9 (including work on ISO 20022), providing the vote for the United States on any SC9 ballot, and providing subject matter experts, when needed, to develop international ISO standards for the group. The TAG may, with the support of other members, put forward requests for new work items as the need is determined. The SC9 subcommittee has the following work groups:

<table>
<thead>
<tr>
<th>Work Group</th>
</tr>
</thead>
<tbody>
<tr>
<td>WG1 – Semantic Model</td>
</tr>
<tr>
<td>WG3 – Revision of 8583 &amp; 18245</td>
</tr>
<tr>
<td>WG4 – Revision of 20022</td>
</tr>
<tr>
<td>TG1 – Card Standards</td>
</tr>
</tbody>
</table>

The X9 TAG to ISO TC68/SC9 meets once a month, only X9 Category “A” members can participate. (This restriction is due to the added expense to X9 for working with ISO.)

Note: In addition to representing the United States on TC68/SC9, this TAG also represents X9 on the ISO 20022 RMG. See below for more details. If you are interested in ISO 20022, joining this TAG will provide access to ISO TC68/SC9 (the standard) and to the ISO 20022 RMG (operations).

**TAG Chair:** Rich Robinson
12.3 ISO 20022 Registration Management Group (RMG)

Scope
The ISO 20022 Registration Management Group (RMG) is made of senior industry experts nominated by registered Member Entities. The RMG was created in 2004 and had its first meeting in January 2005. It is the highest ISO 20022 registration body: it supervises the overall registration process and reports to ISO TC68/SC9. The role of the RMG is to promote and support the involvement of financial service actors to facilitate the registration and maintenance of high quality globally relevant ISO 20022 compliant business models for exchange of information for financial services.

The mission of the RMG is to ensure that ISO 20022 is a trusted standard providing high quality business models for exchange of information for financial services. The RMG defines the scope of necessary SEGs, approves business justifications for new messages and allocates them to one or more SEGs. The RMG also acts as a "court of appeal" in case of conflicts between the RA, the TSG, the SEGs and the organizations that want to develop ISO 20022 messages (submitting organizations). This group is independent of X9.

ISO 20022 RMG Chair – Mike Tagai

X9 Representatives to the RMG:
- Rich Robinson (primary)
- Ted Rothschild (Alt)
- Mark Tiggas (Alt)

Current Projects
1. Vetting requests to register new information or data in the 20022 model

Participation in the RMG:
Participation in the ISO 20022 RMG is through the X9 TAG to ISO TC68/SC9. Since SC9 is the home of the ISO 20022 standard, it is appropriate for the TAG handle all issues with the ISO 20022 RMG. The X9 TAG to ISO TC68/SC9 meets once a month and covers issues with SC9 and the RMG. Only X9 Category “A” members can participate. (This restriction is due to the added expense to X9 for working with ISO.)

12.4 ISO TC321 – Transaction Assurance in E-Commerce (X9 is the US TAG)

Scope
Standardization in the field of “transaction assurance in e-commerce related upstream/downstream processes”, including the following:
- Assurance of transaction process in e-commerce (including easier access to e-platforms and e-stores);
- Protection of online consumer rights including both prevention of online disputes and resolution process;
- Interoperability and admissibility of inspection result data on commodity quality in cross-border e-commerce;
• Assurance of e-commerce delivery to the final consumer.

**ISO TC321 Chair** - Mingshun Song (China)
**X9 US TAG Chair to TC321** – Colin Rule

**Current Standards Projects**
1. ISO/PWI 5106 - Guidelines on sharing of product traceability information in e-commerce
2. ISO/PWI 5107 - Guidelines on acceptance of product quality evaluation information in e-commerce
3. ISO/WD 32110 - Transaction assurance in E-commerce ---- Terminology
4. ISO/WD 32111 - Transaction assurance in E-commerce — Principles and Framework
13.0 X9 Liaisons & Relationships with other Organizations

13.1 Liaison with ISO TC307

Scope: Standardization of blockchain technologies and distributed ledger technologies.
Secretariat: South Africa
Chairperson: Mr. Craig Dunn
X9 Liaison to ISO TC307: Jeff Stapleton

X9 has a liaison agreement with ISO TC307. This allows X9 to monitor and comment on their work.

13.2 Liaison with the Object Management Group (OMG)

About the OMG:
The Object Management Group® (OMG®) is an international, open membership, not-for-profit technology standards consortium with representation from government, industry and academia. OMG Task Forces develop enterprise integration standards for a wide range of technologies and an even wider range of industries. OMG's modeling standards enable powerful visual design, execution and maintenance of software and other processes.

X9 has an agreement that allows the adoption of the Financial Instrument Global Identifier standard as an American National Standard under X9.

13.3 Liaison with PCI Security Standards Council

About PCI SSC:
The PCI Security Standards Council (PCI SSC) is a global forum for the ongoing development, enhancement, storage, dissemination and implementation of security standards for account data protection. Our role is to enhance global payment account data security by developing standards and supporting services that drive education, awareness, and effective implementation by stakeholders. We achieve this with a strategic framework to guide our decision-making process and ensure that every initiative is aligned with our mission and supports the needs of the global payments industry.

X9 has an agreement with PCI SSC to share development and support of the PCI Security Requirements and Testing Procedures (also known as the PCI PIN Security Standard).

13.4 Member of Faster Payments Council

About the FPC:
The Faster Payments Council (FPC) is an industry-led membership organization whose vision is a world-class payment system where every person or organization can safely and
securely pay anyone, anywhere, at any time and with near-immediate funds availability. By
design, the FPC encourages a diverse range of perspectives and is open to all stakeholders in the
U.S. payment system. Guided by principles of fairness, inclusiveness, flexibility and
transparency, the FPC uses collaborative, problem-solving approaches to resolve the issues that
are inhibiting broad faster payments adoption in this country.

X9 is a founding member and participates in the work of the FPC. X9 is also available to
develop standards when needed.

### 13.5 Member of Afinis – Interoperability Standards

**About Afinis:**
Afinis is a membership-based standards organization that brings together diverse collaborators –
through innovative and agile processes – to develop implementable, interoperable and portable
API standards and other financial services standards across operating environments and
platforms.

X9 is a founding member and their parent organization, NACHA, is a member of X9. X9
provides personnel to help develop APIs.

### 13.6 Member of ISITC

**About ISITC:**
ISITC brings together investment managers, broker dealers, custodians, utilities and technology
vendors to develop and promote standards and best practices that increase operational
efficiencies across the securities industry, enabling member companies to provide essential and
enhanced products and services. Founded in 1991, ISITC’s membership totals more than 2,000
financial services professionals representing more than 60 firms and trillions of dollars in
AUM/AUA. Through its member committees and work groups, ISITC plays a direct role in
shaping the future of securities operations by creating and updating market practices, and
educating the membership around emerging trends in technology and regulations.

X9 is a member of ISITC and they are a member of X9. ISITC participates on the X9D
subcommittee.

**End of Document**
